The U.S. liability shift dates for EMV are set. Issuers and acquirer-processors must now begin their EMV programs to be in compliance to protect their existing business and take advantage of new opportunities. Are you EMV ready? SCIL has been at the forefront of EMV payments innovation for more than 16 years. SCIL consultants have 42 EMV implementations completed worldwide, including Europe, North America and the Far East. SCIL's EMV offering provides quick, efficient and cost effective EMV software solutions, consultancy and training is designed to get you EMV ready quickly. SCIL's innovative software solutions are backed by leading edge EMV consultation and integration services from assessment to project implementation. Delivered by the most knowledgeable EMV technical and business experts, SCIL gets you EMV ready in weeks rather than months.

SCIL's new QuickStart™ EMV product platform sets a new standard for EMV payment services. Today, most payment systems are heavily customized. Issuers and processors are reluctant to either change legacy systems or completely replace them. It's costly and time consuming. SCIL's new QuickStart™ EMV Platform overcomes these challenges. QuickStart™ EMV is a scalable payments framework where Issuers and processors plug-in the EMV enabling modules they need when they need them without replacing their legacy systems. QuickStart™ EMV gets you EMV ready quickly, and efficiently at minimal cost. QuickStart™ EMV is backed by 24/7 global technical support and equitable pricing.
